STATEMENT OF ESTIMATED REGULATORY COSTS

ESTABLISHMENT OF VILLAGE COMMUNITY DEVELOPMENT DISTRICT NO. 14

1.0 Introduction

1.1 Purpose and Scope

This statement of estimated regulatory costs (SERC) supports the petition to establish Village Community Development District No. 14 (the "District") The proposed District will include approximately 2499.60 acres of land on which roughly 7,000 dwelling units are planned for development The District proposes to provide infrastructure and community services to this area in the District as described more fully below.

The limitations on the scope and use of this SERC are set out in Section 190.002(2)(d), Florida Statutes ("F S "), as follows

"That the process of establishing such a District pursuant to uniform general law shall be fair and based only on factors material to managing and financing the service delivery function of the District, so that any matter concerning permitting or planning of the development is not material or relevant "

1.2 Overview of the Proposed District No 14

The proposed District would provide community infrastructure, services, and facilities, along with their operations and maintenance, to the proposed area, located in the City of Leesburg, Lake County, Florida The proposed District will encompass 2499.60 acres to be used exclusively for residential development. The District will include roughly 7,000 units with a mix of housing types, designs and models consistent with previous completed by the developer

1.3 Requirements for Statement of Estimated Regulatory Costs (SERC)

Section 120.541(2), F S (2020) defines the elements a SERC must contain (or in this case, City ordinance)

(a) An economic analysis showing whether the rule directly or indirectly

- 1 Is likely to have an adverse impact on economic growth, private sector job creation or employment, or private sector investment in excess of \$1 million in the aggregate within five (5) years after the implementation of the rule,

2 Is likely to have an adverse impact on business competitiveness, including the ability of persons doing business in the state to compete with persons doing business in other states or domestic markets, productivity, or innovation in excess of \$1 million in the aggregate within five years after the implementation of the rule, or

3 Is likely to increase regulatory costs, including any transactional costs, in excess of \$1 million in the aggregate within five years after the implementation of the rule

(b) A good faith estimate of the number of individuals and entities likely to be required to comply with the rule, together with a general description of the types of individuals likely to be affected by the rule

(c) A good faith estimate of the cost to the agency, and to any other state and local government entities, of implementing and enforcing the proposed rule, and any anticipated effect on state or local revenues

(d) A good faith estimate of the transactional costs likely to be incurred by individuals and entities, including local government entities, required to comply with the requirements of the rule. As used in this section, "transactional costs" are direct costs that are readily ascertainable based upon standard business practices, and include filing fees, the cost of obtaining a license, the cost of equipment required to be installed or used or procedures required to be employed in complying with the rule, additional operating costs incurred, the cost of monitoring and reporting, and any other costs necessary to comply with the rule

(e) An analysis of the impact on small businesses as defined by Section 288 703, F S , and an analysis of the impact on small counties and small cities as defined in Section 120 52, F S. The impact analysis for small businesses must include the basis for the agency's decision not to implement alternatives that would reduce adverse impacts on small businesses

(f) Any additional information that the agency determines may be useful

(g) In the statement or revised statement, whichever applies, a description of any regulatory alternatives submitted under paragraph (1)(a) and a statement adopting the alternative or a statement of the reasons for rejecting the alternative in favor of the proposed rule.

2.0 An economic analysis showing whether the rule/ordinance directly or indirectly will have an adverse impact on economic growth, job creation, employment, private-sector investment, business competitiveness, or regulatory costs.

Section 120.541(2)(a), F.S., requires an economic analysis showing whether the establishment of the District will directly or indirectly have an adverse impact on economic growth, job creation, employment, private-sector investment, business competitiveness, or regulatory costs exceeding \$1 million in the aggregate within five years after the establishment takes place. The answer, based upon numerous other residential community development Districts, is that the establishment of the District will not have an adverse impact on economic growth, job creation, employment, private-sector investment, business competitiveness, or regulatory costs.

The establishment of the District is likely to increase economic growth, job creation, employment, private-sector investment, and business competitiveness. This is because the District will provide infrastructure improvements within the District's boundaries, allowing for the development of the land within the District. The development is planned to include roughly 7,000 dwelling units. The residents of the District will purchase goods and services. This new demand created by the District's residents will increase economic growth, job creation, employment, private-sector investment, and business competitiveness in the areas surrounding the District.

The District will have the ability to assess the property owners to pay for the installation, operation, and maintenance of its infrastructure improvements. However, such costs will not be in addition to, or unique to, the District. The infrastructure improvements to be funded by the District would be required to support development of the planned residences, regardless of the District's existence. Community development districts, such as District No. 14, can fund their infrastructure improvements with long-term bond financing that typically carries more favorable terms than other sources of funding. Thus, the costs related to the installation of the public infrastructure serving the planned development will not be increased due to the existence of the District.

- 3.0 A good-faith estimate of the number of individuals and entities likely to be required to comply with the rule/ordinance, together with a general description of the types of individuals likely to be affected by the rule/ordinance.**

The landowner of the District plans to develop roughly 7,000 dwelling units within the District. Establishment of the proposed District would put all of these residents under the jurisdiction of the proposed District. Prior to the sale of the property within the District, the developer will also be subject to the District's jurisdiction.

- 4.0 Good-faith estimate of the cost to state and local government entities, of implementing and enforcing the proposed ordinance, and any anticipated effect on state and local revenues**

4.1 Impact on State and Local Costs

State Government Entities

There will be only modest costs to various Florida ("State") governmental entities due to the formation of the District. The District consists of less than 2,500 acres, therefore, the City of Leesburg (the "City") is the establishing entity, pursuant to Florida Statutes Section 190.005(2). The State will incur no costs in reviewing the petition to establish the District and the State will not be required to hold any public hearings on the matter.

The ongoing costs to various State entities to implement and enforce the establishment of the District relate strictly to the receipt and processing of various reports that the District is required to file annually with the State and its various entities. These annual reports are outlined in the attached Appendix. However, the costs to the State agencies that will receive and process the District's reports will be minimal. The District is only one of many governmental subdivisions required to submit various reports to the State. Additionally, pursuant to Section 189.018, F.S., the District will pay an annual fee to the State Department of Economic Opportunity to offset such processing costs.

The City of Leesburg

City staff will process, analyze, and conduct public hearing(s) on the petition to establish the District. These activities will utilize the time of the staff and City Commissioners. However, these costs to the City are likely to be minimal for a number of reasons. First, review of the petition does not include analysis of the development to be served by the District. Second, the petition itself provides most of the information needed for City staff's review. Third, the City currently employs the staff needed to conduct the review of the petition. Fourth, no capital expenditure is required to review the petition. Finally, local governments routinely process similar petitions for land use and zoning changes that are more complex than is the petition to establish a Community Development District.

The annual costs to the City, related to the ongoing operations of the District, are also minimal. The District will be an independent unit of local government. The only annual costs incurred by the City will be the minimal costs of receiving and, to the extent desired, reviewing the various reports that the District is required to provide to the City.

4.2 Impact on State and Local Revenues

Adoption of the proposed ordinance will have no negative impact on State or local revenues. The District is an independent unit of local government. It is designed to provide community facilities and services to serve the development. It has its own sources of revenue. No State or local subsidies are required or expected.

In this regard, it is important to note that any debt obligations incurred by the District to construct its infrastructure, or for any other reason, are not debts of the State, the County, the City, or any unit of local government. By State law, the debts of the District are strictly its own responsibility.

5.0 A good-faith estimate of the transactional costs likely to be incurred by individuals and entities required to comply with the requirements of the rule/ordinance.

Table 2, below, provides an outline of the various facilities and services the proposed District may provide. The District plans to fund, own, operate, and maintain certain drainage and stormwater systems, landscaping, and ponds. The District will also plan, construct, and finance some of the community's roadways, along with possibly offsite roadway improvements. The roadways and drainage systems within publicly dedicated rights-of-way will be conveyed to the appropriate general-purpose government for operation and maintenance. The landowner will construct the utilities and other community infrastructure and facilities. The District will be responsible for maintenance of some of these facilities.

Table 2 Proposed Facilities and Services

<u>Improvements/Facility</u>	<u>Funded By</u>	<u>O&M By</u>	<u>Ownership</u>
Roads	Landowner/CDD	City	City
Utilities	Landowner	Landowner	Landowner
Amenities	Landowner	CDD	Landowner/CDD
Drainage	CDD	CDD	CDD
Landscape/Lakes	CDD	CDD	CDD

The petitioner has estimated the costs for providing the capital improvements and facilities outlined in Table 2. The cost estimates for these improvements and facilities are shown in Table 3, below. Total costs are estimated at approximately \$299,522,252. To fund these improvements, the District may issue special assessment or other revenue bonds. These bonds would be repaid through non-ad valorem assessments levied on all properties located within the District that benefit from these improvements.

Table 3 Summary of Estimated Capital Costs and Time Table

<u>Improvement/Facility</u>	<u>Anticipated Schedule</u>	<u>Estimated Cost</u>
Subdivision Infrastructure Roads & Drainage	2021-2024	\$44,077,300
Collector Road Infrastructure Roads & Drainage	2021-2024	\$29,640,656
Multi-Use Trails & Paths, Golf Cart Bridges & Tunnels	2021-2024	\$36,692,068
Landscaping & Irrigation in Common Areas	2021-2024	\$32,440,714
Boundary Security Buffers/Walls & Fencing in Common Areas	2021-2024	\$3,999,077
Master Earthwork and Stormwater Collection Systems	2021-2024	\$143,435,666
Wetland & Wildlife Mitigation/Protection Measures	2021-2024	\$1,750,481
Project Entry Features	2021-2024	\$7,486,290
TOTAL:		\$299,522,252

*Note: Costs are preliminary in nature and are subject to change. Costs include engineering and contingencies.

Prospective future landowners in the District may be required to pay non-ad valorem assessments levied by the District to secure the debt incurred by the District through one or more bond issuances. In addition to the levy of non-ad valorem assessments for debt service, the District may also impose a non-ad valorem assessment to fund the operations and maintenance of the District and its facilities and services.

It is important to note that the various costs outlined in Table 3 are typical for residential developments of the type contemplated here. In other words, there is nothing unusual about the District's financing that requires additional infrastructure over and above what would normally be needed. Therefore, these costs are not in addition to normal development costs. Instead, the facilities and services provided by the District are substituting in part for developer-provided infrastructure and facilities. Along these same lines, District-imposed assessments for operations and maintenance costs are similar to what would be charged in any event by a property owner's association common to most master-planned developments.

Real estate markets take into account the District's cost because buyers and renters evaluate all of the costs and benefits associated with various alternative locations. Therefore, market forces preclude developers from marking up the prices of their products beyond what the competition allows. To remain competitive, the operations and maintenance charges must also be in line with the competition.

Furthermore, locating in the District by new residents is completely voluntary. So ultimately, all owners and users of the affected property choose to accept the District's costs because of the benefits that the District provides.

The District is an alternative means to finance necessary community services. District financing is no more expensive, and often less expensive, than the alternatives of a municipal services taxing unit (MSTU), a neighborhood association, County provision (directly or via a dependent special District), or through developer-bank loans.

6.0 An analysis of the impact on small businesses, as defined by Section 288.703, F.S., and an analysis of the impact on small counties and small cities as defined by Section 120.52, F.S.

There will be no adverse impact on small businesses because of establishment of the District. If anything, the impact will be positive. This is because the District must competitively bid certain of its contracts. This affords small businesses the opportunity to bid on District work.

The City of Leesburg has an estimated population of 22,672 according to the most recent U.S. Census Bureau (2019) and the population was 20,117 at the 2010 census. Therefore, the City is not defined as a "small" City according to Section 120.52 of the Florida Statutes. However, as noted above, there will be no adverse impact on the City due to the creation of the District. The District will provide infrastructure facilities and services to the property

located within the District. These facilities and services will help to make this property developable.

Development of the property within the District will increase the value of this property, and consequently, will increase the property taxes that accrue to the City. These increased property taxes, along with other direct and indirect revenues accruing to the City as a result of the development of the land within the District, will offset any new staff, facilities, or equipment the City adds to provide services to the property owners within the District.

7.0 Any additional useful information.

The analysis provided above is based on a straightforward application of economic theory, especially as it relates to tracking the incidence of regulatory costs and benefits. Inputs were received from the developer's engineer and other professionals associated with the developer.

It is useful to reflect upon the question of whether the establishment of the District is the best alternative to provide community facilities and services to the development. As an alternative to the District, the City could approve a dependent special District for the area, such as an MSBU or a special taxing District under Chapter 170 of the Florida Statutes. Either of these alternatives could finance the improvements contemplated in Table 2 in a fashion similar to the existing District.

However, unlike the District, the alternatives would require the City to continue to administer the projects and its facilities and services. As a result, the costs for these services and facilities would not be sequestered to the land directly benefiting from them, as the case would be with the District. In addition, administering a project of the size and complexity of the development program for the District is a very significant and expensive undertaking, especially in light of the fact that the District already exists.

Another alternative to the District would be for the developer to provide the infrastructure and to use a property owners association (POA) for operations and maintenance of community facilities and services. A District is superior to a POA for a variety of reasons. First, unlike a POA, a District can impose and collect its assessments along with other property taxes on the combined real estate tax bill through the County tax collector. Therefore, the District is far more assured of obtaining its needed funds than is a POA. Second, the District is a unit of local government. Therefore, unlike a POA, the District must abide by all governmental rules and regulations.

Additionally, any debt of a District is strictly the District's responsibility. While it may be technically true that the debt of a City-established, dependent special District, is not strictly the City's responsibility, any financial problems that the special District may have will inevitably entangle the City. This will not be the case if the District is established as proposed.

With a District, residents (owners and renters) within the District would have a focused unit of government under their direct control. The District can then be more responsive to resident needs without disrupting other City responsibilities.

AN ORDINANCE OF THE CITY OF LEESBURG, FLORIDA, AMENDING THE BOUNDARY LINES OF THE VILLAGE COMMUNITY DEVELOPMENT DISTRICT NO. 14, PURSUANT TO CHAPTER 190, FLORIDA STATUTES; AND PROVIDING AN EFFECTIVE DATE. (VILLAGES CDD 14)

WHEREAS, on July 26, 2021, the City Commission adopted Ordinance No. 21-30 establishing the Village Community Development District No. 14, pursuant to Chapter 190, Florida Statutes, providing for authority and power of the District, providing for the Board of Supervisors of the District, providing for the District Budget, Providing for Functions of the District, providing for miscellaneous provisions, and providing for an effective date; and

WHEREAS, The Village Community Development District No. 14 (the "Petitioner") has petitioned the City Commission for the City of Leesburg, Florida (the "City") to adopt an ordinance amending the District Boundary Lines, pursuant to Chapter 190, Florida Statutes; and

WHEREAS, the City has considered and finds that the proposed amended boundary lines are not inconsistent with any element or portion of the applicable Comprehensive Plan; and

WHEREAS, the City has considered and finds that the area of land within the amended District is a sufficient size, and is sufficiently compact, and is sufficiently contiguous to be developed as a functional interrelated community; and

WHEREAS, the City has considered and finds that the amended District is the best alternative for delivering the community development services and facilities to the area that will be served by the District; and

WHEREAS, the City has considered and finds that the community development services and facilities of the amended District will not be incompatible with the capacity and uses of existing local and regional community development services and facilities; and

WHEREAS, the duly noticed public hearing on the Petition was held prior to the adoption of this Ordinance amending the District boundary lines.

NOW THEREFORE, BE IT ORDAINED by the City Commission of the City of Leesburg, Florida, as follows:

SECTION 1. AUTHORITY. This ordinance is adopted in compliance with and pursuant to the Uniform Community Development Act of 1980, Chapter 190, Florida Statutes, (2021), as amended.

SECTION 2. EXTERNAL BOUNDARIES OF THE DISTRICT. The external boundaries of the District are amended and described in Exhibit 1 attached hereto contains the overall area containing approximately 2,385.2 acres.

SECTION 3. SEVERABILITY. If any provision of this Ordinance, or application therefore, is finally determined by a Court of competent jurisdiction to be invalid, illegal, or unenforceable, such

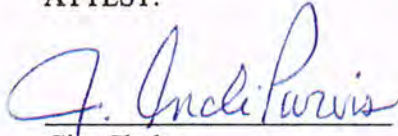

provision shall be deemed to be severable and the remaining provisions shall continue in full force and effect provided that the invalid, illegal, or unenforceable provision is not material to the logical and intended interpretation of this Ordinance.

SECTION 4. EFFECTIVE DATE. This Ordinance shall take effect upon its passage and adoption pursuant to general law.

PASSED AND ADOPTED by the City Commission of the City of Leesburg, Florida at a regular meeting held on the 14th day of February, 2022.

THE CITY OF LEESBURG, FLORIDA
